

Continental Traction: Jamie Anderson's Signature Snowboard Bindings

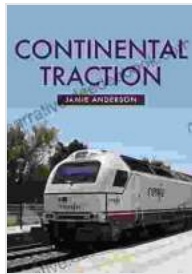

Continental Traction is Jamie Anderson's signature snowboard bindings from Burton. These bindings are designed for high-performance riding and feature a number of innovative features that make them ideal for riders of all levels. In this article, we'll take a closer look at the Continental Traction bindings and discuss their features, benefits, and performance.

The Continental Traction bindings feature a number of innovative features that make them ideal for high-performance riding. These features include:

- **EST Baseplate:** The EST baseplate is a lightweight and durable baseplate that provides a direct connection between the binding and the snowboard. This direct connection provides increased stability and control, and it also helps to reduce vibration.
- **Hammockstrap 2.0:** The Hammockstrap 2.0 is a comfortable and supportive ankle strap that provides a secure fit without being too restrictive. The hammock-style design of the strap helps to distribute pressure evenly across the ankle, and it also provides excellent support for high-speed riding.
- **Supergrip Capstrap:** The Supergrip Capstrap is a toe strap that provides a secure and comfortable fit. The capstrap design of the strap helps to keep the toe in place, and it also helps to prevent the strap from slipping.
- **Re:Flex FullBED Cushioning System:** The Re:Flex FullBED Cushioning System is a full-length cushioning system that provides

excellent vibration dampening. This cushioning system helps to reduce fatigue and it also provides a more comfortable ride.

The Continental Traction bindings offer a number of benefits for riders of all levels. These benefits include:

- **Increased stability and control:** The EST baseplate provides a direct connection between the binding and the snowboard, which results in increased stability and control. This is especially beneficial for high-speed riding and for riding in difficult conditions.
- **Improved comfort:** The Hammockstrap 2.0 and Supergrip Capstrap provide a comfortable and supportive fit. This is especially important for riders who spend a lot of time on their feet.
- **Reduced vibration:** The Re:Flex FullBED Cushioning System provides excellent vibration dampening. This helps to reduce fatigue and it also provides a more comfortable ride.
- **All-around performance:** The Continental Traction bindings are designed for all-around performance. They are ideal for riders of all

levels, and they can be used for a variety of riding styles.

The Continental Traction bindings perform exceptionally well in a variety of riding conditions. They provide excellent stability and control, and they are very comfortable to wear. The bindings are also very responsive, and they allow riders to make quick and precise turns.

Overall, the Continental Traction bindings are a high-performance binding that is ideal for riders of all levels. They are comfortable, supportive, and responsive, and they provide excellent stability and control.

If you are looking for a high-performance snowboard binding that is comfortable, supportive, and responsive, then the Continental Traction bindings are a great option. These bindings are designed for all-around performance, and they are ideal for riders of all levels.
